## WHERE CAN MATH TAKE YOU?

### EVERYONE CAN BE A SCIENTIST

*"STEM is where the concepts needed to solve the world's biggest problems are learned. Don't be afraid to ask questions and challenge assumptions, it will help in your learning. Never let the time it takes deter you from pursuing what you love."*

*-Lynette Campbell-*

### *Did you know?*

Math can take you to THE BIG careers! (THE BIG = teaching, higher education, business, industry, and government.)  
It is also a lot of fun!

---

Lynette Campbell is a Project Leader a at Honda in Marysville, Ohio. She uses math to lead her team of scientists and engineers in the development of 3D models for vehicle parts and automation equipment.

---

Lynette Campbell was born in Columbus, Ohio where she attended Independence High School. She attended Kentucky State University and Ohio State University for college, earning degrees in applied mathematics and mechanical engineering in just 5 years.
